# ISO 21350:2023-04 (E)

## Space systems - Off-the-shelf item utilization

## Contents

Page

Foreword ..... v

Introduction ..... vi

1 Scope ..... 1

2 Normative references ..... 1

3 Termsanddefinitions ..... 1

4 Requirements ..... 2
4.1 Responsibilities ..... 2
4.2 Tailoring ..... 2

5 Policy ..... 2
5.1 Evaluation of the OTS item design ..... 2
5.1.1 General ..... 2
5.1.2 OTS item requirements ..... 2
5.1.3 OTS item evaluation ..... 2
5.2 Rules in a critical application of OTS ..... 3
5.2.1 Operational boundaries ..... 3
5.2.2 Design evaluation ..... 3
5.2.3 OTS item modifications ..... 3
5.2.4 Qualification requirements ..... 3

6 Precautions and warning notes ..... 4
6.1 Notes about product heritage of OTS item ..... 4
6.1.1 OTS product heritage ..... 4
6.1.2 Application of OTS item design/manufacturing practices ..... 4
6.1.3 OTS item design margins ..... 4
6.2 Acquisition of OTS items ..... 4
6.2.1 General ..... 4
6.2.2 Specification ..... 4
6.2.3 Space environment ..... 4
6.2.4 Configuration control ..... 4
6.2.5 Acceptance testing ..... 4
6.2.6 Maintenance ..... 5
6.3 Management of modified OTS item ..... 5
6.3.1 Purchasing ..... 5
6.3.2 Qualification ..... 5
6.4 Programmatic decision to use an OTS item ..... 5
6.4.1 Functional/technical capability ..... 5
6.4.2 Interface definition ..... 5
6.4.3 Modification versus heritage ..... 5

7 Decision logic for OTS item usage ..... 5

8 Procedure ..... 6
8.1 Categorizing of available OTS items ..... 6
8.2 Considering a good candidate for selection ..... 6
8.3 Compromise of discrepancies between an OTS item and project requirements ..... 6
8.4 Satisfying the OTS item's requirements ..... 6

8.4.1 Qualification plan ..... 6
8.4.2 Categorization ..... 6
8.4.3 Combining the parameters ..... 7

Annex A (informative) A decision logic for OTS item utilization ..... 8

Annex B (normative) Requirement list for OTS item utilization ..... 12

Annex C (informative) OTS item application categories ..... 14

Bibliography ..... 15
