

ISO/TS 6434:2024-01 (E)

Space systems - Design, testing and operation of a large constellation of spacecraft

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative reference	1
3	Terms and definitions	1
4	Abbreviated terms	2
5	Requirements	2
5.1	Mission design	2
5.1.1	Orbit selection of constellation and maintenance to minimise collision risk	2
5.1.2	Intra-constellation collision avoidance	2
5.1.3	Space debris mitigation	3
5.1.4	Selection of launch service providers	3
5.1.5	Assessment on the long-term evolution of debris environment	3
5.2	Spacecraft design	3
5.2.1	Reliability design	3
5.2.2	Design to support collision avoidance	5
5.2.3	Space debris mitigation design	5
5.2.4	Design to support successful disposal	5
5.2.5	Safe re-entry	5
5.2.6	Large constellation radio frequency interference mitigation	5
5.2.7	Large constellation minimization of disruptive visual brightness	6
5.3	Qualification and testing	6
5.3.1	Verification and validation based upon established standards and procedures	6
5.3.2	Test and checkout before to injecting into the planned orbit	6
5.4	Operations and collision avoidance	6
5.4.1	Quality and reliability control during operation	6
5.4.2	Conjunction assessment and collision avoidance	7
5.4.3	Large constellation Radio frequency interference mitigating operation	8
5.4.4	Large constellation operation to minimise disruptive visual brightness	8
5.5	Disposal of spacecraft	8
5.5.1	Post-mission disposal	8
5.5.2	Criteria for initiating disposal	8
5.5.3	Determination of mission extension or termination	8
5.5.4	Disposal upon decommissioning	8
5.5.5	Spacecraft passivation	9
5.5.6	Active debris removal in operations	9
