

DIN EN 14824:2005-10 (E)

Space engineering - Testing; English version EN 14824:2003

Contents

	Page
Foreword.....	6
1 Scope	7
2 Normative references	7
3 Terms, definitions and abbreviated terms	8
3.1 Terms and definitions.....	8
3.2 Abbreviated terms	12
4 General requirements.....	15
4.1 Testing philosophy.....	15
4.2 Model philosophy	16
4.3 Development testing.....	17
4.4 Qualification testing	17
4.5 Acceptance testing.....	18
4.6 Protoflight testing.....	18
4.7 Retesting.....	19
4.8 Test conditions and tolerances.....	20
4.9 Operations validation testing	25
4.10 Test data	30
4.11 Test documentation.....	30
5 Qualification testing	32
5.1 Equipment test requirements	32
5.2 Subsystem test requirements	72
5.3 Element test requirements.....	73
5.4 System qualification test.....	91
6 Acceptance testing.....	91
6.1 Equipment test requirements	91
6.2 Subsystem test requirements	102
6.3 Element test requirements.....	103
6.4 System test requirements	108
7 Protoflight testing	108
7.1 Equipment test requirements	108
7.2 Subsystem test requirements	109
7.3 Element test requirements.....	109
7.4 System test requirements	110
8 Pre-launch testing.....	110
8.1 General.....	110
8.2 Functional tests	111
8.3 Propulsion tests.....	111
8.4 Integrated launch system test.....	111
8.5 Manned related tests	111
9 In-orbit testing.....	112
10 Post-landing testing	113
Annex A (informative) Mechanical and vibration testing for space equipment.....	114
A.1 Derivation of qualification test levels for units from mechanical test data analysis.....	114
A.1.1 Introduction	114
A.1.2 Unit level random testing	116
A.1.3 Unit level sinusoidal testing	117
A.1.4 References.....	117
A.2 Vibration test philosophy.....	117

A.3	Technical information on mechanical test factors	119
A.3.1	Introduction	119
A.3.2	References	119
A.3.3	Loads	120
A.3.4	Margin of safety	120
A.4	Microgravity environment compatibility (MEC)	120
A.4.1	Introduction	120
A.4.2	Disturbance source definition	121
A.4.3	MEC control approach	121
Annex B	(informative) Temperature limits and test levels for space equipment	124
B.1	Introduction	124
B.2	References	124
B.3	Influence of equipment temperature limits on thermal design	124
B.4	Verification by analysis concerning accuracy and level of confidence	125
B.4.1	General philosophy of uncertainty application	125
B.4.2	Temperature uncertainty determination	127
B.4.3	Quantification of uncertainty values	129
B.4.4	Test correlation criteria	130
B.5	Standardization of equipment temperature limits	131
B.5.1	Evaluation and classification of equipment data	131
B.5.2	Standardization approach	131
B.6	Standardization of thermal vacuum and cycling test conditions	132
B.6.1	Evaluation of test requirements	132
B.6.2	Standardization approach	132
B.7	Conclusions	136
Annex C	(normative) Test requirement specification - DRD	138
C.1	Introduction	138
C.2	Scope and applicability	138
C.2.1	Scope	138
C.2.2	Applicability	138
C.3	References	138
C.3.1	Glossary and dictionary	138
C.3.2	Source document	138
C.4	Terms and definitions and abbreviations	138
C.4.1	Terms and definitions	138
C.4.2	Abbreviations	138
C.5	Description and purpose	139
C.6	Application and interrelationship	139
C.7	Test requirement specification preliminary elements	139
C.7.1	Title	139
C.7.2	Title page	139
C.7.3	Contents list	139
C.7.4	Foreword	139
C.7.5	Introduction	140
C.8	Content	140
C.8.1	Scope and applicability	140
C.8.2	References	140
C.8.3	Definitions and abbreviations	141
C.8.4	General test conditions and requirements	141
C.8.5	Qualification testing	141
C.8.6	Acceptance testing	142
C.8.7	Protoflight testing	142
C.8.8	Re-testing methodology	142
C.8.9	GSE testing	142
	Bibliography	143
