

DIN EN 14607-8:2005-10 (E)

Space engineering - Mechanical - Part 8: Materials; English version EN 14607-8:2004

Inhalt	Seite
Foreword	4
1 Scope	5
2 Normative references	5
3 Terms and definitions and abbreviated terms	5
3.1 Terms and definitions	5
3.2 Abbreviated terms	6
4 Requirements	7
4.1 General	7
4.1.1 Overview	7
4.1.2 Applicability	7
4.1.3 Controlling documentation	7
4.2 Mission	7
4.3 Functionality	7
4.3.1 Strength	7
4.3.2 Elastic modulus	8
4.3.3 Fatigue	8
4.3.4 Fracture toughness	8
4.3.5 Creep	8
4.3.6 Micro-yielding	8
4.3.7 Coefficient of thermal expansion and coefficient of moisture expansion	8
4.3.8 Stress corrosion	9
4.3.9 Corrosion fatigue	9
4.3.10 Hydrogen embrittlement	9
4.3.11 Mechanical contact surface effects	10
4.4 Mission constraints	10
4.4.1 General	10
4.4.2 Temperature	10
4.4.3 Thermal cycling	11
4.4.4 Vacuum (outgassing)	11
4.4.5 Manned environment	11
4.4.6 Offgassing, toxicity and odour	11
4.4.7 Bacterial and fungus growth	11
4.4.8 Flammability	11
4.4.9 Astronaut spacesuits	12
4.4.10 Radiation	12
4.4.11 Electrical charge and discharge	13
4.4.12 Lightning strike	13
4.4.13 Chemical (corrosion)	13
4.4.14 Fluid compatibility	13
4.4.15 Galvanic compatibility	13
4.4.16 Atomic oxygen	14
4.4.17 Micrometeoroids and debris	14
4.4.18 Moisture absorption and desorption	14
4.5 Interfaces	14
4.5.1 General	14
4.5.2 Passivation layers	15
4.5.3 Anodizing	15
4.5.4 Chemical conversion	15
4.5.5 Metallic coatings (overlay and diffusion)	15
4.5.6 Hard coatings	16

4.5.7	High temperature oxidation protective coatings.....	16
4.5.8	Thermal barriers.....	16
4.5.9	Moisture barriers.....	16
4.5.10	Diffusion barriers.....	16
4.5.11	Coatings on CFRP	17
4.6	Joining	17
4.6.1	General.....	17
4.6.2	Mechanical fastening	17
4.6.3	Adhesive bonding.....	18
4.6.4	Fusion	18
4.7	Design	19
4.7.1	General.....	19
4.7.2	Material design allowables	19
4.7.3	Metal design allowables.....	20
4.7.4	Composite design allowables	20
4.7.5	Composite sandwich constructions.....	21
4.7.6	Aluminium	21
4.7.7	Steel	22
4.7.8	Titanium	22
4.7.9	Magnesium alloys	23
4.7.10	Beryllium and beryllium alloys.....	23
4.7.11	Mercury	23
4.7.12	Refractory alloys.....	23
4.7.13	Superalloys.....	23
4.7.14	Other metals.....	23
4.7.15	Castings.....	24
4.7.16	Forgings.....	24
4.7.17	Glass and ceramics	24
4.7.18	Ceramic Matrix Composites — CMC (including carbon-carbon).....	24
4.7.19	Polymers (thermosets and thermoplastics).....	24
4.7.20	Rubbers (excluding adhesive rubbers)	25
4.7.21	Lubricants.....	25
4.7.22	Thermal control insulants (including ablative materials).....	25
4.7.23	Optical materials.....	26
4.8	Verification	26
4.8.1	General.....	26
4.8.2	Metallic materials.....	26
4.8.3	Composite materials — laminates	26
4.8.4	Mechanical and physical test methods	27
4.8.5	Test methods on metals.....	27
4.8.6	Test methods on composites.....	28
4.8.7	Non-destructive inspection (NDI).....	29
4.8.8	Proof testing.....	29
4.9	Production and manufacture.....	30
4.9.1	General.....	30
4.9.2	Procurement.....	30
4.9.3	Manufacturer	30
4.9.4	Supplier.....	30
4.10	In-service	30
4.10.1	General.....	30
4.10.2	Maintenance	31
4.10.3	Inspection	31
4.10.4	Repair.....	31
4.11	Data exchange.....	31
4.12	Product assurance	32
4.13	Deliverables.....	33
	Bibliography.....	34
