

DIN EN 14607-2:2006-12 (E)

Space engineering - Mechanical - Part 2: Structural; English version EN 14607-2:2004

Contents	page
Foreword	5
1 Scope	7
2 Normative references.....	7
3 Terms, definitions, abbreviated terms and units	7
3.1 Terms and definitions	7
3.2 Abbreviated terms	10
4 Requirements.....	11
4.1 General	11
4.2 Mission	11
4.2.1 Lifetime	11
4.2.2 Natural and induced environment	12
4.2.3 Mechanical environment	12
4.2.4 Microgravity, audible noise and human vibration	13
4.2.5 Corrosion effects.....	13
4.2.6 Ablation and pyrolysis	13
4.2.7 Micrometeoroid and debris collision.....	13
4.2.8 Venting and purging.....	13
4.2.9 Mass and inertia properties.....	13
4.2.10 Load events.....	14
4.2.11 Limit loads.....	15
4.2.12 Design loads	15
4.2.13 Structural reliability	15
4.3 Functionality	16
4.3.1 Strength	16
4.3.2 Buckling	16
4.3.3 Stiffness	16
4.3.4 Dynamic behaviour	16
4.3.5 Thermal.....	16
4.3.6 Pressure	17
4.3.7 Damage tolerance.....	17
4.3.8 Fracture control	17
4.3.9 Tolerances and alignments	18
4.3.10 Electrical conductivity	18
4.3.11 Lightning protection.....	18
4.3.12 Electromagnetic compatibility	18
4.3.13 Dimensional stability.....	18
4.4 Constraints.....	18
4.5 Interface.....	18
4.6 Design.....	19
4.6.1 Inspectability.....	19
4.6.2 Interchangeability.....	20
4.6.3 Maintainability.....	20
4.6.4 Availability.....	20
4.6.5 Design concept.....	20
4.6.6 Design optimization	21
4.6.7 Material allowables.....	21
4.6.8 Metals	22
4.6.9 Non- metallic materials	22
4.6.10 Composite fibre reinforced materials.....	23
4.6.11 Adhesive materials in bonded joints.....	23
4.6.12 Margin of safety (MOS)	23

4.6.13	Factors of safety (FOS)	23
4.6.14	Scatter factors.....	24
4.7	Verification	24
4.7.1	General verification	24
4.7.2	Verification by analysis.....	24
4.7.3	Modelling aspects	24
4.7.4	Static analysis.....	25
4.7.5	Modal analysis	25
4.7.6	Response analysis	25
4.7.7	Acoustics analysis	25
4.7.8	Fluid structure interaction (FSI).....	25
4.7.9	Fatigue analysis.....	26
4.7.10	Fracture mechanics analysis	26
4.7.11	Verification of composite structures.....	26
4.7.12	Buckling analysis	26
4.7.13	Thermo-elastic analysis.....	26
4.7.14	Adhesive connections	26
4.7.15	Bolted connections	27
4.7.16	Welded connections.....	27
4.7.17	Riveted connections	27
4.7.18	Insert connections.....	27
4.7.19	Aeroelasticity	27
4.7.20	Mass and inertia properties.....	27
4.7.21	Alignments	27
4.7.22	Dimensional stability.....	27
4.7.23	Microgravity, audible noise and human vibration analysis	28
4.7.24	Verification by test	28
4.7.25	Static test.....	28
4.7.26	Modal survey test	29
4.7.27	Dynamic tests: sine, random, shock	29
4.7.28	Acoustic test	29
4.7.29	Fatigue and fracture test.....	29
4.7.30	Microgravity, audible noise and human vibration tests	29
4.7.31	Non- destructive inspection and test	30
4.7.32	Thermal stress and distortion test.....	30
4.7.33	Thermal cycling test.....	30
4.7.34	Ageing test	30
4.7.35	Contamination test	30
4.7.36	Mass and Inertia properties measurement	30
4.7.37	Alignment checks	30
4.7.38	Dimensional stability tests	30
4.7.39	Geometrical control.....	30
4.7.40	Interface verification	30
4.7.41	Aerothermodynamic test	31
4.7.42	Aeroelasticity test.....	31
4.7.43	Lightning protection verification	31
4.8	Production and manufacturing	31
4.8.1	General	31
4.8.2	Procurement.....	31
4.8.3	Manufacturing process	31
4.8.4	Manufacturing drawings	31
4.8.5	Tooling.....	32
4.8.6	Component manufacture	32
4.8.7	Assembly.....	32
4.8.8	Storage	33
4.8.9	Cleanliness.....	33
4.8.10	Health and safety	33
4.9	In-service	33
4.9.1	Ground inspection.....	33
4.9.2	In-orbit inspection	33
4.9.3	Evaluation of damage	34
4.9.4	Maintenance	34

4.9.5	Repair	35
4.10	Data exchange	35
4.10.1	General	35
4.10.2	System and structure subsystem.....	36
4.10.3	Design and manufacturing.....	36
4.10.4	Design and structural analysis	36
4.10.5	Other subsystem and structural analysis.....	36
4.10.6	Tests and structural analysis.....	36
4.10.7	Structural mathematical models.....	36
4.11	Product assurance	37
4.11.1	General	37
4.11.2	Model traceability	37
4.12	Deliverables	37
4.12.1	General	37
4.12.2	Documents	37
Annex A (informative) Effective mass definition.....		40
Annex B (informative) Spacecraft (STM approach) development assumptions.....		43
B.1	Development assumptions.....	43
B.2	Loads and factors relationship	43
B.3	Common factors values.....	44
Annex C (informative) Launcher structural element		46
C.1	Development assumptions.....	46
C.2	Loads and factors relationships	46
C.3	Common factors values for ARIANE.....	47
