## Surface chemical analysis - Depth profiling - Measurement of sputtering rate: mesh-replica method using a mechanical stylus profilometer

---

| <b>Contents</b>   |   | <b>Page</b> |
|---|---|-------------|
| Foreword .....  |   | iv          |
| Introduction .....  |   | v           |
| 1   | Scope .....   | 1           |
| 2   | Terms and definitions .....   | 1           |
| 3   | Symbols and abbreviated terms .....                                     | 2           |
| 4   | Principle .....   | 2           |
| 5   | Procedure .....   | 2           |
| 5.1   | Generating the replica pattern .....                                    | 2           |
| 5.2   | Measurement of sputtered crater depth using a stylus profilometer ..... | 8           |
| 5.3   | Estimation of sputtering rate .....                                     | 11          |
| 6   | Summary of round-robin results .....                                    | 11          |
| Annex A (informative) Geometry of specimen surface and ion gun .....            |   | 12          |
| Annex B (informative) Dependence of replica patterns on mesh-opening size ..... |   | 15          |
| Bibliography .....  |   | 18          |
