

DIN EN ISO 21587-2:2007-12 (E)

Chemical analysis of aluminosilicate refractory products (alternative to the X-ray fluorescence method) - P art 2: Wet chemical analysis (ISO 21587-2:2007)

Contents

Page

Foreword	3
1 Scope	4
2 Normative references	4
3 Determination of residual silicon(IV) oxide in solution	5
4 Determination of aluminium oxide	6
5 Determination of iron(III) oxide	8
6 Determination of titanium(IV) oxide	10
7 Determination of manganese(II) oxide by permanganate absorption spectrophotometric method	12
8 Determination of calcium oxide	13
9 Determination of magnesium oxide	14
10 Determination of sodium oxide by flame photometry	15
11 Determination of potassium oxide by flame photometry	17
12 Determination of chromium(III) oxide using diphenylcarbazide	17
13 Determination of zirconium oxide by Xylenol orange	19
14 Determination of phosphorus(V) oxide by molybdenum blue	20
15 Test report	22
