## Non-destructive testing - Discontinuities in specimens for use in qualification examinations

---

Contents	Page
<b>Foreword .....</b>	<b>iv</b>
1 <b>Scope .....</b>	1
2 <b>Normative references .....</b>	1
3 <b>Terms and definitions .....</b>	1
4 <b>Specimens .....</b>	1
5 <b>Product sectors .....</b>	2
5.1 <b>General .....</b>	2
5.2 <b>Castings (c) .....</b>	2
5.3 <b>Welded test specimens (w) .....</b>	2
5.4 <b>Wrought test specimen (wp) .....</b>	3
5.5 <b>Forgings (f) .....</b>	3
5.6 <b>Tubes and pipes (t) .....</b>	3
6 <b>Minimum size of discontinuity .....</b>	4
6.1 <b>General .....</b>	4
6.2 <b>Radiographic testing (RT) .....</b>	4
6.3 <b>Ultrasonic testing (UT) .....</b>	4
6.4 <b>Magnetic particle (MT) and liquid penetrant testing (PT) .....</b>	5
6.5 <b>Eddy current testing (ET) .....</b>	5
6.6 <b>Visual testing (VT) .....</b>	5
7 <b>Surface conditions .....</b>	5
8 <b>Number of discontinuities .....</b>	5
9 <b>Radiographic interpretation practical examination (radiographs) .....</b>	5
9.1 <b>Introduction .....</b>	5
9.2 <b>Conditions .....</b>	6
9.3 <b>Quality .....</b>	6
10 <b>Specimen master report .....</b>	6
<b>Annex A (informative) Discontinuities in castings .....</b>	<b>7</b>
<b>Annex B (informative) Discontinuities in welds .....</b>	<b>9</b>
<b>Annex C (informative) Discontinuities in wrought products .....</b>	<b>11</b>
<b>Annex D (informative) Discontinuities in wrought forgings .....</b>	<b>13</b>
<b>Annex E (informative) Discontinuities in tubes and pipes .....</b>	<b>15</b>
<b>Annex F (informative) Discontinuities in in-service inspection .....</b>	<b>17</b>
