DIN 54403:2009-04 (E)

Testing of ion exchangers - Determination of the total capacity of cation exchangers

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4

4 Unit 4

5 Principle 4
5.1 General 4
5.2 Strongly acidic exchangers 5
5.2.1 General 5
5.2.2 Total capacity 5
5.3 Weakly acidic exchangers 5
5.3.1 General 5
5.3.2 Total capacity 5

6 Designation 5

7 Apparatus 6

8 Reagents 8

9 Sampling 8

10 Sample preparation 8
10.1 Strongly acidic cation exchangers 8
10.1.1 General (see flowcharts 1 and 2) 8
10.2 Weakly acidic cation exchangers 8

11 Volume adjustment 8

12 Determination and evaluation of the total capacity of strongly acidic cation exchangers (method A) 9

13 Determination and evaluaation of total capacity of weakly acidic cation exchangers (method B) 11

14 Rapid method of determining total capacity of strongly acidic cation exchangers (method C) 13
14.1 Reagents 13
14.1.1 Sample preparation 13
14.1.2 Determining the total capacity 13
14.2 Apparatus 13
14.2.1 Sample preparation 13
14.2.2 Determining the total capacity 13
14.3 Apparatus settings 13
14.3.1 Sample preparation 13
14.3.2 Determining the total capacity 13
14.4 Procedure 14

14.4.1 Sample preparation 14
14.4.2 Determining the total capacity (KT in mol/l) 14
14.5 Calculation of total capacity KT (in mol/l) 14

15 Test report 16
