DIN EN 1097-2:2010-07 (E)

Tests for mechanical and physical properties of aggregates - Part 2: Methods for the determination of resistance to fragmentation

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4

4 Apparatus 5
4.1 General apparatus 5
4.2 Additional apparatus required for the determination of resistance to fragmentation by the Los Angeles test method 5
4.3 Additional apparatus required for the determination of resistance to fragmentation by the impact test method 7

5 Determination of resistance to fragmentation by the Los Angeles test method 7
5.1 Principle 7
5.2 Preparation of test portion 7
5.3 Test procedure 8
5.4 Calculation and expression of results 8
5.5 Test report 8

6 Determination of resistance to fragmentation by the impact test method 8
6.1 Principle 8
6.2 Preparation of test specimens 9
6.3 Test procedure 9
6.4 Calculation and expression of results 10
6.5 Test report 10

Annex A (normative) Determination of the resistance to fragmentation of aggregates for railway ballast 11

Annex B (informative) Alternative narrow range classifications for the Los Angeles test 14

Annex C (informative) The impact tester: Construction, operation and safety requirements 15

C.1 General 15
C.2 Construction 15
C.3 Lifting device 15
C.4 Sample holder 16
C.5 Anvil 17
C.6 Base plate and dampers 17
C.7 Safety requirements and testing 18
C.8 Checking of impact tester 18

Annex D (informative) Checking of the impact tester 25

D.1 General 25
D.2 Checklist 25
D.3 Apparatus and test agents 25
D.4 Procedure 27

Annex E (informative) Precision **29**

E.1 General **29**
E.2 Los Angeles test **29**
E.3 Impact test **29**

Annex F (informative) Worked example of calculation of impact value SZ **30**

Annex G (informative) Alternative narrow range classification for the Los Angeles test of 16/32 mm recycled aggregates **31**

Bibliography **32**
