

DIN EN 15979:2011-04 (E)

Testing of ceramic raw and basic materials - Direct determination of mass fraction s of impurities in powders and granules of silicon carbide by OES by DC arc excitation

Contents		Page
Foreword		3
1	Scope	4
2	Principle	4
3	Spectrometry	4
4	Apparatus	4
5	Reagents	5
6	Sampling and preparation of test samples	5
7	Calibration	5
8	Procedure	6
9	Calculation	8
10	Expression of results	8
11	Precision	8
12	Test report	9
Annex A (informative) Results of inter-laboratory study		10
Annex B (informative) Wavelength and working range		14
Annex C (informative) Possible interferences and their elimination		16
Annex D (informative) Information regarding the evaluation of the uncertainty of the mean value		19
Annex E (informative) Commercial certified reference materials		20
Bibliography		21
