DIN EN ISO 10801:2011-04 (E)

Nanotechnologies - Generation of metal nanoparticles for inhalation toxicity testing using th e evaporation/condensation method (ISO 10801:2010)

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Principle 7
4.1 Generation 7
4.2 Preparation of system 8

5 Requirements 8
5.1 Capacity and control 8
5.2 Nanoparticle properties 9
5.3 Exposure chamber atmosphere 9
5.4 System operational safety 9

6 Characterization of generator performance 10
6.1 Requirements for particle size distribution and mass concentration 10
6.2 Particle size distribution measurement 10
6.2.1 Sampling with DMAS 10
6.2.2 Sampling for microscopy 10
6.3 Mass concentration measured by filter sampling 10
6.3.1 Filter sampling for aerosol mass concentration 11
6.3.2 Frequency of sampling 11

7 Nanoparticle generation specifications 11
7.1 Test particle purity/impurities 11
7.2 Size range 11
7.3 Number concentration 11
7.4 Nanoparticle shape 11
7.5 Stability 11
7.6 Animal exposure 12

8 Assessment of results 12

9 Test report 12

Annex A (informative) Example method for evaporation/condensation generation of silver nanoparticles 13

Bibliography 25
