

ISO 27468:2011-07 (E)

Nuclear criticality safety - Evaluation of systems containing PWR UOX fuels - Bounding burnup credit approach

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Methodology for criticality safety evaluations considering burnup of the fuel	3
5	Implementation of criticality safety evaluations considering burnup of the fuel	6
Annex A (informative) Validation of the depletion codes against post-irradiation examination data		7
Annex B (informative) Operational implementation of a burnup credit application		8
Bibliography		9
