## Non-destructive testing - Ultrasonic testing - General principles

---

| <b>Contents</b> |   | <b>Page</b> |
|-----------------|---|-------------|
| Foreword .....  |   | iv          |
| <b>1</b>        | <b>Scope .....</b>  | <b>1</b>    |
| <b>2</b>        | <b>Normative references .....</b>                         | <b>1</b>    |
| <b>3</b>        | <b>Qualification and certification of personnel .....</b> | <b>2</b>    |
| <b>4</b>        | <b>Information required prior to examination .....</b>    | <b>2</b>    |
| <b>5</b>        | <b>Principles of ultrasonic examination .....</b>         | <b>3</b>    |
| 5.1             | General .....   | 3           |
| 5.2             | Vibration mode and direction of sound propagation .....   | 3           |
| 5.3             | Transmission technique .....                              | 3           |
| 5.4             | Pulse echo technique .....                                | 3           |
| <b>6</b>        | <b>Equipment .....</b>                                    | <b>4</b>    |
| 6.1             | Ultrasonic instrument .....                               | 4           |
| 6.2             | Ultrasonic probes .....                                   | 4           |
| 6.2.1           | Probe selection .....                                     | 4           |
| 6.2.2           | Frequency and dimensions of transducer .....              | 4           |
| 6.2.3           | Dead zone .....   | 4           |
| 6.2.4           | Damping .....   | 5           |
| 6.2.5           | Focusing probes .....                                     | 5           |
| 6.3             | Coupling media .....                                      | 5           |
| 6.4             | Calibration blocks .....                                  | 5           |
| 6.5             | Reference blocks .....                                    | 5           |
| 6.6             | Specific blocks .....                                     | 6           |
| <b>7</b>        | <b>Settings .....</b>                                     | <b>6</b>    |
| 7.1             | General settings .....                                    | 6           |
| 7.2             | Range settings .....                                      | 6           |
| 7.3             | Amplification .....                                       | 7           |
| 7.4             | Pulse repetition frequency .....                          | 7           |
| <b>8</b>        | <b>Preparation for examination .....</b>                  | <b>7</b>    |
| 8.1             | Surface preparation .....                                 | 7           |
| 8.2             | Identification and datum points .....                     | 7           |
| 8.3             | Application of transfer correction .....                  | 7           |
| <b>9</b>        | <b>Examination .....</b>                                  | <b>8</b>    |
| 9.1             | Examination coverage .....                                | 8           |
| 9.2             | Overlap and scanning speed .....                          | 8           |
| 9.2.1           | Overlap .....   | 8           |
| 9.2.2           | Scanning speed .....                                      | 8           |
| 9.3             | Evaluation and recording levels .....                     | 8           |
| 9.3.1           | Pulse echo technique .....                                | 8           |
| 9.3.2           | Transmission technique .....                              | 8           |
| <b>10</b>       | <b>Characterization of imperfections .....</b>            | <b>8</b>    |
| 10.1            | Pulse echo technique .....                                | 8           |
| 10.2            | Transmission techniques .....                             | 9           |

|    |                             |    |
