## Rubber, natural latex concentrate - Determination of KOH number

---

| <b>Contents</b>   |                             | <b>Page</b> |
|---|-----------------------------|-------------|
| Foreword .....  |                             | iv          |
| 1   | Scope .....                 | 1           |
| 2   | Normative references .....  | 1           |
| 3   | Terms and definitions ..... | 1           |
| 4   | Reagents .....              | 1           |
| 5   | Apparatus .....             | 2           |
| 6   | Sampling .....              | 2           |
| 7   | Procedure .....             | 2           |
| 8   | Expression of results ..... | 3           |
| 9   | Precision .....             | 3           |
| 10  | Test report .....           | 3           |
| Annex A (informative) Determination of formaldehyde .....                                   |                             | 5           |
| Annex B (informative) Example of a typical titration and calculation of the end-point ..... |                             | 6           |
| Annex C (informative) Precision statement .....   |                             | 8           |
| Bibliography .....  |                             | 10          |
