## Corrosion of metals and alloys - Stress corrosion testing - Part 1: General guidance on testing procedures

---

| <b>Contents</b>  |  | <b>Page</b> |
|--|--|-------------|
| Foreword .....   |  | iv          |
| 1  | Scope .....                                | 1           |
| 2  | Terms and definitions .....                | 1           |
| 3  | Background .....                           | 2           |
| 4  | Selection of test method .....             | 3           |
| 5  | Stressing systems .....                    | 4           |
| 5.1  | General .....                              | 4           |
| 5.2  | Constant total strain tests .....          | 4           |
| 5.3  | Constant load tests .....                  | 5           |
| 5.4  | Slow strain rate tests .....               | 6           |
| 6  | Environmental aspects .....                | 7           |
| 6.1  | General .....                              | 7           |
| 6.2  | Temperature .....                          | 7           |
| 6.3  | Water chemistry .....                      | 7           |
| 6.4  | Flow rate .....                            | 9           |
| 6.5  | Electrochemical aspects .....              | 9           |
| 7  | Time dependent issues .....                | 10          |
| 7.1  | General .....                              | 10          |
| 7.2  | Pitting and intergranular corrosion .....  | 10          |
| 7.3  | Hydrogen uptake .....                      | 10          |
| 8  | Specimen design and manufacture .....      | 11          |
| 8.1  | General .....                              | 11          |
| 8.2  | Surface condition .....                    | 11          |
| 8.3  | Area effects .....                         | 13          |
| 8.4  | Pre-cracked test pieces .....              | 13          |
| 8.5  | Welds .....                                | 14          |
| 9  | Stress corrosion test cells .....          | 14          |
| 10   | Initiation of stress corrosion tests ..... | 15          |
| 11   | Assessment and treatment of results .....  | 15          |
| Annex A (informative) Guide to selection of mechanical test method ..... |  | 18          |
| Bibliography .....   |  | 20          |
