Surface chemical analysis - Fundamental approaches to determination of lateral resolution and sharpness in beam-based methods

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Terms and definitions	1
3	Symbols and abbreviated terms	4
4	Determination of lateral resolution and sharpness by imaging of stripe patterns	7
4.1	Theoretical background	7
4.2	Determination of the line spread function and the modulation transfer function by imaging of a narrow stripe	21
4.3	Determination of the edge spread function (ESF) by imaging a straight edge	41
4.4	Determination of lateral resolution by imaging of square-wave gratings	56
5	Physical factors affecting lateral resolution, analysis area and sample area viewed by the analyser in AES and XPS	96
5.1	General information	96
5.2	Lateral resolution of AES and XPS	97
5.3	Analysis area	104
5.4	Sample area viewed by the analyser	106
6	Measurements of analysis area and sample area viewed by the analyser in AES and XPS	107
6.1	General information	107
6.2	Analysis area	108
6.3	Sample area viewed by the analyser	109
Annex A (informative) Reduction of image period for 3-stripe gratings		110
Bibliography		113
