## Surface chemical analysis - Fundamental approaches to determination of lateral resolution and sharpness in beam-based methods

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Terms and definitions .....	1
3	Symbols and abbreviated terms .....	4
4	Determination of lateral resolution and sharpness by imaging of stripe patterns .....	7
4.1	Theoretical background .....	7
4.2	Determination of the line spread function and the modulation transfer function by imaging of a narrow stripe .....	21
4.3	Determination of the edge spread function (ESF) by imaging a straight edge .....	41
4.4	Determination of lateral resolution by imaging of square-wave gratings .....	56
5	Physical factors affecting lateral resolution, analysis area and sample area viewed by the analyser in AES and XPS .....	96
5.1	General information .....	96
5.2	Lateral resolution of AES and XPS .....	97
5.3	Analysis area .....	104
5.4	Sample area viewed by the analyser .....	106
6	Measurements of analysis area and sample area viewed by the analyser in AES and XPS .....	107
6.1	General information .....	107
6.2	Analysis area .....	108
6.3	Sample area viewed by the analyser .....	109
Annex A (informative) Reduction of image period for 3-stripe gratings .....		110
Bibliography .....		113
