Nanotechnologies - Guidance for developing representative test materials consisting of nano-objects in dry powder form

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Specific physico-chemical characterization requirements for representative test materials consisting of nano-objects in dry powder form	2
4.1	General	2
4.2	Properties and measurement methods	2
5	Information related to quality management	3
6	Contents of verification report	4
6.1	General	4
6.2	Description of the representative test material	4
6.3	Measurement result	4
Annex A (informative) Verification report (example)		6
Bibliography		8
