

DIN EN ISO 14577-1:2015-11 (E)

Metallic materials - Instrumented indentation test for hardness and materials parameters - Part 1: Test method (ISO 14577-1:2015)

Contents		Page
European foreword		3
Introduction		4
1 Scope		5
2 Normative references		5
3 Symbols and designations		6
4 Principle		8
5 Testing machine		8
6 Test piece		9
7 Procedure		9
8 Uncertainty of the results		12
9 Test report		13
Annex A (normative) Materials parameters determined from the force/indentation depth data set		15
Annex B (informative) Types of control use for the indentation process		28
Annex C (normative) Machine compliance and indenter area function		29
Annex D (informative) Notes on diamond indenters		31
Annex E (normative) Influence of the test piece surface roughness on the accuracy of the results		32
Annex F (informative) Correlation of indentation hardness H_{IT} to Vickers hardness		33
Annex G (normative) Drift and creep rate determination		35
Annex H (informative) Estimation of uncertainty of the calculated values of hardness and materials parameters		37
Annex I (normative) Calculation of radial displacement correction		47
Bibliography		49
