ISO/TR 16335:2013-09 (E)

Corrosion of metals and alloys - Corrosion tests in artificial atmospheres - Guidelines for selection of accelerated corrosion test for product qualification

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Categories and characteristics of accelerated corrosion tests 2

4 Recommended fields of application for different kinds of tests and their suitability 4

5 Corrosivity of tests and relative corrosion rates of standard metals 6

6 Requirements for test equipment and reproducibility of test results 8

7 Recommended procedures for product qualification 8

Annex A (informative) Characteristics of standardized accelerated atmospheric corrosion tests 10

Annex B (informative) Initial risk analysis of potential failure modes for products or functional units 16
