|-----------------------|---|-------------|
| Foreword .....        |   | 3           |
| 1                     | Scope .....   | 4           |
| 2                     | Normative references .....                                | 4           |
| 3                     | Terms and definitions .....                               | 4           |
| 4                     | Principle .....   | 5           |
| 4.1                   | Slip resistance .....                                     | 5           |
| 4.2                   | Displacement space .....                                  | 5           |
| 5                     | Testing of slip resistance .....                          | 5           |
| 5.1                   | Apparatus and test equipment .....                        | 5           |
| 5.1.1                 | Testing footwear .....                                    | 5           |
| 5.1.2                 | Test apparatus with safety equipment .....                | 5           |
| 5.1.3                 | Lubricant .....   | 6           |
| 5.1.4                 | Flooring test piece .....                                 | 6           |
| 5.2                   | Calibration (selection and training of the testers) ..... | 7           |
| 5.3                   | Procedure .....   | 8           |
| 5.4                   | Evaluation .....  | 8           |
| 5.5                   | Classification .....                                      | 9           |
| 6                     | Measurement of the displacement space .....               | 9           |
| 6.1                   | General .....   | 9           |
| 6.2                   | Test apparatus .....                                      | 9           |
| 6.3                   | Test specimen .....                                       | 9           |
| 6.4                   | Determination of paste density .....                      | 9           |
| 6.5                   | Procedure .....   | 10          |
| 6.6                   | Evaluation and classification .....                       | 10          |
| 7                     | Test report .....   | 10          |
| Annex A (informative) | Testing process .....                                     | 11          |
| A.1                   | Calibration .....   | 11          |
| A.2                   | Procedure .....   | 11          |
| A.3                   | Evaluation .....  | 11          |
| A.4                   | Classification .....                                      | 11          |
| Annex B (informative) | Outsoles of the testing footwear .....                    | 12          |
