

DIN EN 12496:2014-02 (E)

Galvanic anodes for cathodic protection in seawater and saline mud

Contents		Page
Foreword		3
Introduction		4
1 Scope		5
2 Normative references		5
3 Terms and definitions		5
4 Galvanic anode materials and their properties		8
4.1 General		8
4.2 Anode alloy composition		8
4.3 Electrochemical properties		9
4.3.1 General		9
4.3.2 Potential		9
4.3.3 Current capacity		9
4.3.4 Anode consumption rate		10
5 Anode design and acceptance criteria		10
5.1 General		10
5.2 Chemical composition		11
5.3 Physical properties		11
5.4 Electrochemical testing		11
5.5 Anode core materials		12
5.6 Cable connections		13
Annex A (normative) Physical tolerances for galvanic anodes		14
A.1 Anode mass		14
A.2 Anode dimensions and straightness		14
A.3 Steel core		15
A.4 Anode surface irregularities		15
A.5 Cracks in cast anodic material		15
A.5.1 General		15
A.5.2 Stand-off and flush mounting anodes		16
A.5.3 Bracelet anodes		16
A.6 Internal defects and destructive testing		16
Annex B (informative) Composition and performance properties for galvanic anodes		18
B.1 Aluminium alloys		18
B.1.1 Anode material		18
B.1.2 Electrochemical properties		19
B.2 Magnesium alloy		20
B.2.1 Anode material		20
B.2.2 Electrochemical properties		21
B.3 Zinc alloy		22
B.3.1 Anode material		22
B.3.2 Electrochemical properties		23
Annex C (informative) Description of various electrochemical tests		24

C.1	Free running test	24
C.2	Galvanostatic test	24
C.3	Potentiostatic test	24
C.4	Quality control testing	25
Bibliography		26
