

ISO 13095:2014-07 (E)

Surface Chemical Analysis - Atomic force microscopy - Procedure for in situ characterization of AFM probe shank profile used for nanostructure measurement

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Symbols and abbreviated terms	3
5	Procedure for probe characterization	4
5.1	Methods for the determination of AFM probe shapes	4
5.2	Reference sample setting	5
5.3	Requirements of AFM and AFM imaging	6
5.4	Measurement of probe shank profile	7
5.5	Uncertainty of the measurement of the probe shank profile	9
6	Reporting of probe characteristics	10
Annex A (informative) Dependence of AFM images on measurement mode and settings		12
Annex B (normative) Reference sample preparation		15
Annex C (informative) Example of a reference structure		18
Annex D (informative) Results of EPSC measurement repeatability test		20
Annex E (informative) Plane correction for probe shank profile analysis		22
Annex F (informative) Example of a report		23
Bibliography		25
