Textiles - Determination of deodorant property - Part 4: Condensation sampling analysis

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Principle	1
5	Reagents	1
6	Apparatus and materials	2
7	Test method	3
7.1	Sampling of test specimen	3
7.2	Preparation of container	4
7.3	Preparation of odour chemical solution or master gas	4
7.4	Testing procedure	4
7.4.1	Take three specimens from the sample for one test as shown in Table 1	4
7.5	Measurement of odour gas concentration	6
7.5.1	General	6
7.6	Testing without specimen	6
8	Calibration	6
9	Test result	6
9.1	Calculation of the concentration of the odour chemical	6
9.2	Calculation of reduction rate for odour chemical	7
10	Test report	7
Annex A (informative) Actual application of the thermal desorption GC-MS to the measurement of indole, isovaleric acid, and nonenal		8
Annex B (informative) Actual application of ion chromatography to the measurement of hydrogen sulfide		15
Annex C (informative) Actual application of ion chromatography to the measurement of methyl mercaptan		19
Annex D (informative) Practical example		22
