Reference materials - Examples of reference materials for qualitative properties

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 ReferencematerialscertifiedfortheirDNAsequence 1
2.1 General 1
2.2 Selected examples of certified reference materials 1
2.3 Certification approaches applied 2
2.3.1 Processing of the materials 2
2.3.2 Purity assessment 3
2.3.3 Genomic DNA CRMs 4
2.3.4 Characterization (leading to certified values) 4
2.3.5 Additional characterization (leading to non-certified values) 4
2.3.6 Suitability study 4
2.3.7 Homogeneity study 5
2.3.8 Minimum sample intake 5
2.3.9 Short-term and long-term stability 5
2.3.10 Identification probability 6
2.3.11 Documentary and metrological traceability 6

3 Organic reference materials for qualitative analysis 6
3.1 General 6
3.2 Verification of the identification of a marker for steroid abuse 7
3.3 The added value of knowing the synthetic procedure 9

4 Biospecimensofhumanorigin,certifiedforqualitativeproperties 10
4.1 General 10
4.2 Selected human biospecimen examples of reference materials 10
4.3 Certification approaches applied 11
4.3.1 General 11
4.3.2 Processing of the materials 11
4.3.3 Purity assessment 11
4.3.4 Characterization 12
4.3.5 Suitability study 15
4.3.6 Homogeneity study 16
4.3.7 Stability study 16
4.4 Conclusion on biospecimens as reference material certified for qualitative properties 16
4.4.1 General 16
4.4.2 Documentary and metrological traceability 17

5 Reference material for darnel seed identity 17
5.1 General 17
5.2 Preparation of the reference materials 17
5.3 Intended use 18
5.4 Characterization 18
5.4.1 Qualitative property to be characterized 18
5.4.2 Principal of characterization 18
5.4.3 Characterization of the reference material for darnel seed identity 24
5.5 Homogeneity and stability study 28
5.6 Uncertainty 28

5.7 Expressing the qualitative property of the reference material 28
5.8 Traceability 28

6 Colouroffreshwaterculturedpearls 29
6.1 General 29
6.2 Homogeneity testing 29

7 EuropeanPharmacopoeiareferencestandardsforqualitativeanalysis 32

7.1 General 32
7.2 Examples 32
7.2.1 European Pharmacopoeia reference standards for confirmation of identity of a substance for pharmaceutical use by infrared spectrophotometry 32
7.2.2 European Pharmacopoeia reference standards used for identification by nuclear magnetic resonance spectrometry 34
7.2.3 European Pharmacopoeia reference standards used for identification of impurities by liquid chromatography 34
7.2.4 Establishment and production of European Pharmacopoeia reference standards for qualitative use 35

Bibliography 36
