## Metallic materials - Instrumented indentation test for hardness and materials parameters - Part 1: Test method

---

| <b>Contents</b>   | <b>Page</b> |
|---|-------------|
| Foreword .....  | iv          |
| Introduction .....  | v           |
| 1 Scope .....   | 1           |
| 2 Normative references .....  | 1           |
| 3 Symbols and designations .....  | 2           |
| 4 Principle .....   | 4           |
| 5 Testing machine .....   | 4           |
| 6 Test piece .....  | 5           |
| 7 Procedure .....   | 5           |
| 8 Uncertainty of the results .....  | 8           |
| 9 Test report .....   | 9           |
| Annex A (normative) Materials parameters determined from the force/indentation depth data set .....                 | 11          |
| Annex B (informative) Types of control use for the indentation process .....  | 24          |
| Annex C (normative) Machine compliance and indenter area function .....   | 25          |
| Annex D (informative) Notes on diamond indenters .....  | 27          |
| Annex E (normative) Influence of the test piece surface roughness on the accuracy of the results ..                 | 28          |
| Annex F (informative) Correlation of indentation hardness HIT to Vickers hardness .....                             | 29          |
| Annex G (normative) Drift and creep rate determination .....  | 31          |
| Annex H (informative) Estimation of uncertainty of the calculated values of hardness and materials parameters ..... | 33          |
| Annex I (normative) Calculation of radial displacement correction .....   | 43          |
| Bibliography .....  | 45          |
