ISO 16373-1:2015-12 (E)

Textiles - Dyestuffs - Part 1: General principles of testing coloured textiles for dyestuff identification

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Fibre identification 2

5 Dye classes, based on the method of applying the dye 2
5.1 Acid dye 2
5.2 Metal complex acid dye 2
5.2.1 1:1 Metal complex dye 2
5.2.2 1:2 Metal complex dye 2
5.3 Azoic dye 2
5.4 Basic dye (also called cationic dye) 2
5.5 Mordant dye 3
5.6 Direct dye 3
5.7 Disperse dye 3
5.8 Reactive dye 3
5.8.1 General 3
5.8.2 Anthraquinone reactive dye 3
5.9 Sulfur dye 3
5.10 VAT dye 3

6 Complementary dye class, based on chemist classification: Azo dye 3

7 Reagents 4

8 Apparatus 5

9 Conditioning and testing atmosphere 5

10 Preparation of the test specimens 5

11 Procedures (examples) 5
11.1 Pigment identification 5
11.2 Finishing removal treatment 5
11.3 Acid dyes, basic, direct dyes and reactive dyes 5
11.4 VAT dyes, sulfur dyes, reactive dyes, aniline black, azoic dyes, direct dyes, developed disperse dyes and chrome dyes 5
11.5 Metal-complex dyes and disperse dyes 5
11.6 Extraction test 5
11.7 Ash test 5
11.8 Miscellaneous tests 6

12 Testing report 6

Annex A (informative) Explanatory table of colourants (dyes and pigments) used in various textile materials 13

Bibliography 17
