

ISO 16373-1:2015-12 (E)

Textiles - Dyestuffs - Part 1: General principles of testing coloured textiles for dyestuff identification

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Fibre identification	2
5	Dye classes, based on the method of applying the dye	2
5.1	Acid dye	2
5.2	Metal complex acid dye	2
5.2.1	1:1 Metal complex dye	2
5.2.2	1:2 Metal complex dye	2
5.3	Azoic dye	2
5.4	Basic dye (also called cationic dye)	2
5.5	Mordant dye	3
5.6	Direct dye	3
5.7	Disperse dye	3
5.8	Reactive dye	3
5.8.1	General	3
5.8.2	Anthraquinone reactive dye	3
5.9	Sulfur dye	3
5.10	VAT dye	3
6	Complementary dye class, based on chemist classification: Azo dye	3
7	Reagents	4
8	Apparatus	5
9	Conditioning and testing atmosphere	5
10	Preparation of the test specimens	5
11	Procedures (examples)	5
11.1	Pigment identification	5
11.2	Finishing removal treatment	5
11.3	Acid dyes, basic, direct dyes and reactive dyes	5
11.4	VAT dyes, sulfur dyes, reactive dyes, aniline black, azoic dyes, direct dyes, developed disperse dyes and chrome dyes	5
11.5	Metal-complex dyes and disperse dyes	5
11.6	Extraction test	5
11.7	Ash test	5
11.8	Miscellaneous tests	6
12	Testing report	6

Annex A (informative) Explanatory table of colourants (dyes and pigments) used in various textile materials	13
Bibliography	17
