

ISO 16373-1:2015-12 (E)

Textiles - Dyestuffs - Part 1: General principles of testing coloured textiles for dyestuff identification

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Fibre identification	2
5 Dye classes, based on the method of applying the dye	2
5.1 Acid dye	2
5.2 Metal complex acid dye	2
5.2.1 1:1 Metal complex dye	2
5.2.2 1:2 Metal complex dye	2
5.3 Azoic dye	2
5.4 Basic dye (also called cationic dye)	2
5.5 Mordant dye	3
5.6 Direct dye	3
5.7 Disperse dye	3
5.8 Reactive dye	3
5.8.1 General	3
5.8.2 Anthraquinone reactive dye	3
5.9 Sulfur dye	3
5.10 VAT dye	3
6 Complementary dye class, based on chemist classification: Azo dye	3
7 Reagents	4
8 Apparatus	5
9 Conditioning and testing atmosphere	5
10 Preparation of the test specimens	5
11 Procedures (examples)	5
11.1 Pigment identification	5
11.2 Finishing removal treatment	5
11.3 Acid dyes, basic, direct dyes and reactive dyes	5
11.4 VAT dyes, sulfur dyes, reactive dyes, aniline black, azoic dyes, direct dyes, developed disperse dyes and chrome dyes	5
11.5 Metal-complex dyes and disperse dyes	5
11.6 Extraction test	5
11.7 Ash test	5
11.8 Miscellaneous tests	6
12 Testing report	6

Annex A (informative) Explanatory table of colourants (dyes and pigments) used in various textile materials	13
Bibliography	17
