

DIN 25449:2016-04 (E)

Reinforced and prestressed concrete components in nuclear facilities - Safety concept, actions, design and construction

Contents		Page
Foreword		5
1 Scope		6
2 Normative references		6
3 Terms and symbols		7
3.1 Terms		7
3.2 Symbols		7
4 Materials		9
4.1 Concrete		9
4.1.1 General		9
4.1.2 Temperature dependence of characteristic values		10
4.1.3 Bound water content		10
4.1.4 Heat capacity		12
4.2 Reinforcing steel		12
4.3 Prestressing steel		12
5 Actions		12
5.1 General		12
5.2 Permanent actions		13
5.3 Variable actions		13
5.4 Accidental actions		13
5.4.1 General		13
5.4.2 Internal actions		14
5.4.3 External actions		16
6 Safety concept		18
6.1 General		18
6.2 Combination rules		18
6.3 Partial factors and combination factors for actions		20
6.4 Ultimate limit states		21
6.5 Serviceability limit states		23
7 Procedures for structural analysis and verification		23
7.1 General		23
7.2 Linear-elastic analysis		23
7.3 Non-linear analysis		24
7.4 Behaviour of structural elements subjected to dynamic actions		25
7.4.1 General		25
7.4.2 Structural element stiffness		25
7.4.3 Masses		25
7.4.4 Damping of structural elements		26
7.4.5 Soil and foundation		26
7.4.6 Simplified methods for individual structural elements		27
8 Design recommendations		28
8.1 Design strength of reinforced concrete		28
8.2 Ultimate limit strain of reinforcing steel and concrete		29
8.3 Shear forces		29

8.4	Punching shear	30
8.4.1	General	30
8.4.2	Structural elements without punching shear reinforcement	30
8.4.3	Structural elements with punching shear reinforcement	31
8.4.4	Structural members for wreckage loads	33
8.4.5	Structural detailing	34
Annex A (informative) Plant conditions and actions		35
Annex B (informative) Load assumptions due to blast waves from explosions for buildings as a whole and for slender structural elements		38
B.1	General	38
B.2	Rectangular buildings	39
B.2.1	Directly loaded individual structural elements	39
B.2.2	Overall structure, bracing structural elements, foundation	39
B.3	Cylindrical and spherical buildings	39
B.4	Slender structural elements	41
Bibliography		42
