Natural gas - Sampling guidelines

Contents

Page

1 Scope 1

2 Definitions 1

3 Principles of sampling 3

4 Safety precautions 5

5 Technical considerations 7

6 Materials used in sampling 10

7 General preparation of equipment 11

8 Sampling equipment 12

9 Spot sampling 18

10 Direct sampling 19

11 Incremental sampling 21

Annexes A Use of a block valve in direct sampling 23

B Cleaning of steel sampling cylinders 25

C Procedure for low-pressure sampling into glass cylinders 26

D Procedure for sampling by the fill-and-empty method 28

E Procedure for sampling by the controlled-rate method 30

F Procedure for sampling by the evacuated-cylinder method 32

G Guidelines for the calculation of the residence time 34

H Student's Mable 38

J Bibliography 39
