DIN 50106:2016-11 (E)

Testing of metallic materials - Compression test at room temperature

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4

4 Symbols and designations 8

5 Test pieces 9

6 Test arrangement 10

7 Procedure 10

8 Determination of specific properties 11
8.1 General 11
8.2 Determination of upper compressive yield strength 12
8.3 Determination of lower compressive yield strength 12
8.4 Determination of compressive proof strengths 12
8.5 Determination of compressive stress at a specified maximum strain 12
8.6 Determination of compressive strength 13
8.7 Determination of percentage compressive strain at fracture 13
8.8 Bulging 13

9 Test report 14

Annex A (informative) Estimating the uncertainty of measurement 18

A.1 Foreword 18
A.2 Estimating the uncertainty of measurement 18
A.2.1 General 18
A.2.2 Type A - Repeated measurements 18
A.2.3 Type B - Use of other sources (e.g. calibration certificates or tolerances) 19
A.3 Combined standard uncertainty of parameters 20
A.4 Parameters depending on the material and/or the test procedure 22

Bibliography 24
