

DIN EN ISO 20136:2017-07 (E)

Leather - Determination of degradability by micro-organisms (ISO 20136:2017)

Contents	Page
European foreword.....	3
Foreword	4
Introduction	5
1 Scope	6
2 Normative references.....	6
3 Terms and definitions	6
4 Symbols and abbreviated terms	7
5 Principle	7
5.1 Method A: assessment of biodegradation by manual titration	7
5.2 Method B: assessment of biodegradation by infrared detection.....	7
6 Chemicals	8
7 Apparatus and materials.....	9
8 Procedure.....	11
8.1 Collection and preparation of the inoculum	11
8.2 Preparation of the test material and reference material	11
8.3 Test conditions and incubation period	11
8.4 Test equipment.....	11
8.4.1 Equipment for the assessment of biodegradation by manual titration (equipment A)	11
8.4.2 Equipment for the assessment of biodegradation by IR detection (equipment B).....	12
8.5 End of the test.....	12
9 Quantification.....	13
9.1 Equipment for the assessment of biodegradation by manual titration (equipment A)	13
9.1.1 Determination of the organic carbon content	13
9.1.2 Determination of the amount of carbon dioxide produced (Method A)	13
9.1.3 Correcting for normality of HCl.....	13
9.1.4 Percentage of biodegradation from carbon dioxide evolved.....	13
9.2 Equipment for the assessment of biodegradation by IR detection (Method B)	13
9.2.1 Determination of the organic carbon content	13
9.2.2 Determination of the amount of carbon dioxide (CO_2) produced	14
9.2.3 Percentage of biodegradation from CO_2 data.....	14
10 Expression of results.....	15
11 Validity of results	15
12 Test report.....	15
Annex A (informative) Determination of the degree and rate of degradation of the material.....	16
Annex B (informative) Quantitative determination of leather biodegradation.....	21
Bibliography.....	25
