ISO 29945:2016-11 (E)

Refrigerated non-petroleum based liquefied gaseous fuels - Dimethylether (DME) - Method of manual sampling onshore terminals

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Chemical and physical properties of DME 2
4.1 General characteristics 2
4.2 Chemical and physical properties 2

5 Precautions 2
5.1 General 2
5.2 Safety precautions 2
5.3 General precautions for sample cylinders 3
5.4 Sampling point 3

6 Sampling system 3
6.1 Apparatus used for sampling 3
6.2 Materials and structure of sampling line and sample cylinders 5
6.2.1 General 5
6.2.2 Sampling line 5
6.2.3 Sample cylinder 5

7 Sampling 6
7.1 Terminal in a loading port 6
7.2 Terminal in an unloading port 6

8 Preparation for sampling 6
8.1 Visual inspection of sampling line and sample cylinder 6
8.2 Connection of the apparatus 6
8.3 Purging the sampling line and sample cylinder 6

9 Sampling procedure 7
9.1 General 7
9.2 Two-valve sample cylinder with or without ullage tube 7
9.3 Single-valve sample cylinder 7
9.4 Two-valve sample cylinder with a siphon tube 7

10 Adjustment of sample volume 8
10.1 Two-valve sample cylinder without ullage tube 8
10.2 Two-valve sample cylinder with ullage tube 8
10.3 Single-valve sample cylinder 8
10.4 Two-valve sample cylinder with a siphon tube 8

11 Checking for leakage 9

12 Number of samples 9

13 Identification of sample cylinder 9

14 Retention of samples 10
