DIN 50929-2:2017-03 (E)

Corrosion of metals - Corrosion likelihood of metal lic materials when subject to corrosion from the outside - Part 2: Service compo nents inside buildings

Contents

Page

Foreword ... 3

1 Scope ... 4

2 Normative references ... 4

3 Terms and definitions ... 4

4 Materials ... 4

5 Corrosive agents ... 5
5.1 General ... 5
5.2 Alkaline corrosive agents ... 5
5.3 Neutral and weakly acidic corrosive agents ... 5
5.4 Passivity-influencing corrosive agents ... 5

6 Additional corrosion parameters ... 6
6.1 Location of corrosion system ... 6
6.2 Operating conditions ... 6
6.3 Mechanical stresses ... 6
6.4 Electrochemical parameters ... 6

7 Estimating the likelihood of corrosion ... 6
7.1 Unalloyed and low-alloy ferrous materials ... 6
7.1.1 Free corrosion ... 6
7.1.2 Galvanic corrosion ... 7
7.2 High-alloy stainless steels ... 7
7.3 Hot-dip galvanized ferrous materials ... 7
7.4 Copper materials ... 7

8 Corrosion protective measures ... 8
8.1 General ... 8
8.2 Unalloyed and low-alloy ferrous materials ... 8
8.3 High-alloy stainless steels ... 9
8.4 Hot-dip galvanized ferrous materials ... 9
8.5 Copper materials ... 9

Bibliography ... 10
