DIN EN 13588:2018-02 (E)

Bitumen and bituminous binders - Determination of cohesion of bituminous binders with pendulum test

Contents

Page

European foreword 3

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Symbols 6

5 Principle 7

6 Apparatus 8

7 Procedure 12
7.1 Preparation of cubes and supports 12
7.2 Preparation of the binder for test 12
7.3 Preparation of the test assemblies 12
7.4 Storage of the assemblies 13
7.5 Adjustment of the pendulum 13
7.6 Measurement 13
7.6.1 General 13
7.6.2 Number of test repetitions at a given temperature 14
7.6.3 Determination of an average value for ' 14
7.6.4 Special precautions 14
7.7 Selection of test temperatures 15
7.7.1 Initial selection 15
7.7.2 Determination of the maximum cohesion and associated temperature 15
7.7.3 Determination of a full cohesion curve down to a limit cohesion value CL 15

8 Expression of results 15
8.1 General 15
8.2 Determination of the maximum cohesion and associated temperature 16
8.3 Determination of the low and high temperature values corresponding to a given cohesion limit CL 16

9 Precision 17
9.1 General 17
9.2 Unmodified bitumen 17
9.3 Polymer modified bitumen 17

10 Test report 18

Annex A (informative) Example system for keeping the cubes in place 19

Annex B (informative) Example work sheet 20

Annex C (normative) Drawing details 21
