## Gas analysis - Comparison methods for the determination of the composition of gas mixtures based on one- and two-point calibration

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Symbols .....	2
5	Abbreviated terms .....	2
6	Principle .....	3
6.1	General requirements .....	3
6.2	Calibration methods .....	4
7	Main procedure .....	4
7.1	Pre-requisites .....	4
7.2	Sequence of operations (overview) .....	4
7.3	Calibration and measurement designs .....	5
7.3.1	General .....	5
7.3.2	Single-point exact-match calibration (SPEM) .....	6
7.3.3	Single-point through origin calibration (SPO) .....	6
7.3.4	Two-point calibration with a blank (TPB) .....	7
7.3.5	Two-point calibration with bracketing (TPC) .....	7
7.3.6	Multipoint calibration (MPC) .....	8
8	Performance evaluation of the measuring system .....	8
8.1	General .....	8
8.2	Sources of performance evaluation data and alternative approach .....	11
8.2.1	Performance evaluation other than in-house .....	11
8.2.2	Alternative for performance evaluation .....	11
9	Quality assurance measures .....	11
9.1	Validation of the assumptions made .....	11
9.2	Drift/stability control of the measuring system .....	11
10	Report of results .....	12
10.1	Calibration gas certificates .....	12
10.2	Report of analysis .....	12
Annex A (normative) System-stability check required when using exact-match and bracketing designs .....		13
Annex B (normative) Statistics and sensitivity coefficients used in Clause 7 .....		15
Annex C (normative) Alternative approach to assessing the nonlinearity contribution .....		17
Annex D (informative) Worked-out example .....		19

<b>Annex E (informative) Using the designs without preceding system performance evaluation .....</b>	<b>22</b>
<b>Bibliography .....</b>	<b>24</b>
