## Testing of cellular materials - Determination of the resistance to liquids, vapours, gases and solid materials

---

<b>Contents</b>	<b>Page</b>
	Page
Foreword .....	3
Introduction .....	4
1 Scope .....	5
2 Normative references .....	5
3 Principle .....	5
4 Designation .....	6
4.1 Symbols denoting conditioning media .....	6
4.2 Standard designation .....	6
5 Apparatus .....	6
6 Test agents.....	7
6.1 General .....	7
6.2 Liquids .....	7
6.3 Gases and vapours .....	7
6.4 Solids .....	7
7 Preparation and shape of test specimens .....	7
7.1 Specimens for determining changes in mass and size .....	7
7.2 Test specimens for determining the changes in other physical properties .....	8
8 Number of test specimens .....	8
9 Conditioning of test specimens.....	8
10 Conditioning and determination of changes to the test specimens caused by the test agents.....	8
10.1 Temperature.....	8
10.2 Duration of conditioning.....	8
10.3 Examination of test specimens before conditioning in the test agent (to obtain $E_1$ values) .....	9
10.4 Examination of specimens during and at the end of conditioning (to obtain $E_2$ values).....	9
10.5 Removal of test specimens from test agents .....	10
10.6 Examination of reconditioned test specimens with test agent removed (to obtain $E_3$ values) .....	10
10.7 Examination of test liquid (for extractable constituents of the test specimen) (10.6).....	11
11 Evaluation.....	11
11.1 Symbols .....	11
11.2 Determination of absolute and relative changes in mass (in volume) and in size.....	12
11.3 Determination of the absorption of test agent by the test specimen (to be determined with specimen immersed).....	14
11.4 Determination of changes in other physical properties of reconditioned specimens ( $\Delta E_3$ ) .....	14
11.5 Determination of changes in other physical properties of test specimens which give off constituents into the test liquid.....	14
12 Test report.....	15
Bibliography .....	16
