ISO 20486:2017-12 (E)

Non-destructive testing - Leak testing - Calibration of reference leaks for gases

Contents

Page

Foreword v

1 Scope 1

2 Normative references 2

3 Termsanddefinitions 2

4 Nominal leakage rates 3

5 Classificationofleaks 3
5.1 Permeation leak 3
5.2 Conductance leaks 3
5.2.1 Capillary leak 3
5.2.2 Aperture leak (orifice) 4
5.2.3 Compressed powder leak 4

6 Calibration by comparison 4
6.1 Methods A, As, B and Bs 4
6.2 Applicability of comparison methods 4
6.3 Preparation of leaks and apparatus 5
6.3.1 Leak detector 5
6.3.2 Connection to the leak detector 5
6.3.3 Temperature accommodation 7
6.4 Measurement 7
6.4.1 Set-up 7
6.4.2 General measurement sequence 7
6.5 Evaluation for methods A, As, B and Bs (Comparison) 8
6.5.1 Determination of leakage rate 8
6.5.2 Influence factors to measurement uncertainty 9

7 Volumetric calibration 10
7.1 Direct flow (Method C) 10
7.1.1 General 10
7.1.2 Equipment 10
7.1.3 Preparation of leaks and apparatus 10
7.1.4 Measurement 11
7.1.5 Evaluation for Method C (direct flow measurement) 13
7.2 Leak measurement under water (Method D) 14
7.2.1 General 14
7.2.2 Equipment 14
7.2.3 Preparation of leaks and apparatus 14
7.2.4 Measurement 15
7.2.5 Evaluation for Method D 16
7.2.6 Influence factors to measurement uncertainty 17
7.3 Calibration by (volumetric) gas meter (Method E) 17
7.3.1 General 17
7.3.2 Equipment 18
7.3.3 Preparation of leaks and apparatus 18
7.3.4 Measurement 18
7.3.5 Evaluation for Method E (gas meter) 18
7.3.6 Influence factors to measurement uncertainty 19

7.4 Calibration by pressure change in a known volume (Method F) 19
7.4.1 General 19
7.4.2 Preparation of leaks and apparatus 20
7.4.3 Measurement 22
7.4.4 Special situation in vacuum chambers 23
7.4.5 Evaluation for Method F (pressure change) 25
7.4.6 Influence factors to measurement uncertainty 25

7.5 Calibration by volume change at constant pressure (Method G) 26
7.5.1 Equipment 26
7.5.2 Preparation of leaks and apparatus 26
7.5.3 Measurement 26
7.5.4 Evaluation for Method G (volume change at constant pressure) 27

8 Generalinfluences 28

9 Report 28

10 Labelling of reference leaks 29

11 Handling of reference leaks 29
11.1 General 29
11.2 Permeation leaks (normally with reservoir fitted the leak outlet) 29
11.3 Conductance leaks (normally without reservoir) 29

Annex A (informative) Calculation of leakage rate decrease due to tracer gas depletion in the reservoir 30

Bibliography 32
