ISO/TR 19693:2018-02 (E)

Surface chemical analysis - Characterization of functional glass substrates for biosensing applications

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Symbols and abbreviated terms 2

5 Characterization of substrates for biosensors by surface chemical analysis 2
5.1 Introduction 2
5.2 Surface chemical analysis (SCA) 3
5.2.1 General 3
5.2.2 X-ray photoelectron spectroscopy (XPS) 3
5.2.3 Time-of-flight secondary ion mass spectrometry (ToF-SIMS) 4
5.2.4 Near-edge X-ray absorption fine structure (NEXAFS) spectroscopy 4
5.2.5 Other methods 5
5.3 Characterization of microarray glass substrates 6
5.3.1 Glass surface composition 6
5.3.2 Characterization of cleaned and pre-activated glass slides 7
5.4 Characterization of functional silane films formation on glass substrates 8
5.5 Stability and shelf-life of aminosilane-based biosensing platforms on glass 12
5.6 Other types of functionalized glass slides 17

6 Concluding remarks 21

Annex A (informative) Study of pre-cleaned commercial glass slides 25

Bibliography 28
