ISO 20379:2018-02 (E)

Fine ceramics (advanced ceramics, advanced technical ceramics) - Measurement of thixotropic behaviour of ceramic slurry by use of a rotational viscometer

Contents

Page

Foreword iv

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Principle 2
4.1 Evaluation of thixotropic behaviour by hysteresis measurement of flow curve 2
4.2 Evaluation of thixotropic behaviour by time-dependence of shear stress at constant low shear rate 2

5 Apparatus 2
5.1 Measuring system 2
5.2 Basic capacity of the instrument 2
5.3 Calibration of rotational viscometer 3
5.4 Temperature control device 3

6 Pretreatment of the slurry samples 3
6.1 General 3
6.2 Degassing 3
6.3 Dispersion by stirring, mixing and ultrasonication 3

7 Measurement condition 3
7.1 Setting of ceramic slurry to rotational viscometer 3
7.2 Temperature 3

8 Measurement procedure 4
8.1 Measurement of thixotropic behaviour by hysteresis measurement of flow curve 4
8.1.1 Condition of shear rate and setting of measurement range 4
8.1.2 Measurement procedure 4
8.1.3 Analysis method of measurement results 4
8.2 Measurement of thixotropic behaviour by time-dependence of shear stress at constant low shear rate 5
8.2.1 Setting of measurement programme 5
8.2.2 Measurement procedure 5
8.2.3 Analysis method of measurement results 5

9 Test report 6
