ISO 20579-4:2018 (E)

Surface chemical analysis — Guidelines to sample handling, preparation and mounting — Part 4: Reporting information related to the history, preparation, handling and mounting of nano-objects prior to surface analysis

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Provenance information to be collected or retained regarding the history, handling, storage and processing of nano-objects prior to submission for surface analysis

- 4.1 Information record
- 4.2 As-synthesized and as-prepared materials
- 4.3 After testing, exposure, treatment or retrieval

5 Information to be reported related to preparing and mounting of nanomaterials for surface chemical analysis

- 5.1 General
- 5.2 Initial form or packaging of sample
- 5.3 Analysis objective or special requirements
- 5.4 Description of method used to prepare samples for analysis
- 5.5 Method of mounting sample for analysis (see ISO 20579-1 and ISO 20579-2 for examples)

Annex A (informative) Needs for enhanced documentation and application of surface chemical analysis methods to assist in identifying and avoiding artefacts and misinterpretations involving research and applications of nano-objects

- A.1 Overview of challenges
- A.1.1 General
- A.1.2 Synthesis details
- A.1.3 Importance of surfaces and interfaces
- A.1.4 Time and environmentally induced change
- A.2 Three elements critical to materials consistency
- A.2.1 General
- A.2.2 Challenges associated with preparing particles for analysis
- A.2.3 Recommendations for synthesis and characterization of nano-objects

Annex B (informative) Example methods for extraction of nano-objects from solution for surface analysis and issues for dispersion of dry particles

- B.1 Overview
- B.2 Sample cleaning and extraction methods
- B.3 Impact of cleaning process on agglomeration and aggregation
- B.4 Dispersion of nano-objects
- B.5 Substrates used for supporting Nano-objects
- B.6 Deposition on the substrate
- B.7 Issues of contamination and cleanliness

Annex C (informative) Example sample data: collected, recorded and reported for Ag nanoparticles provided by BAM
