ISO 14993:2018 (E)

Corrosion of metals and alloys — Accelerated testing involving cyclic exposure to salt mist, dry and wet conditions

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Test solution

- 4.1 General
- 4.2 Preparation of the sodium chloride solution
- 4.3 pH adjustment

5 Apparatus

- 5.1 Component protection
- 5.2 Exposure equipment

6 Test specimens

7 Arrangement of the test specimens

8 Operating conditions

9 Continuity of tests

10 Duration of tests

11 Treatment of test specimens after testing

- 11.1 General
- 11.2 Non-organic coated test specimens: metallic and/or inorganic coated
- 11.3 Organic coated test specimens
- 11.3.1 Scribed organic coated test specimens
- 11.3.2 Organic coated but not scribed test specimens

12 Evaluation of results

13 Test report

Annex A (informative) Typical apparatus for cyclic salt mist, dry and wet corrosion tests

Annex B (informative) Method for evaluation of the corrosivity of the apparatus

- B.1 Reference test specimens
- B.2 Arrangement of the reference specimens
- B.3 Duration of test
- B.4 Determination of mass loss
- B.5 Satisfactory performance of apparatus

Annex C (normative) Preparation of test specimens with organic coatings for testing

- C.1 Preparation and coating of test specimens
- C.2 Drying and conditioning
- C.3 Thickness of coating

C.4 Preparation of scribes

Annex D (normative) Required supplementary information for testing test specimens with organic coatings
