ISO 1833-27:2018 (E)

Textiles — Quantitative chemical analysis — Part 27: Mixtures of cellulose fibres with certain other fibres (method using aluminium sulfate)

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Reagent

6 Apparatus

7 Sampling and pre-treatment of sample

7.1 Sampling
7.2 Pre-treatment of laboratory test sample

8 Preparation of carbonization solution

9 Test procedure

9.1 General
9.2 Soaking the test specimen with carbonization solution
9.3 Carbonizing
9.4 Removal of carbonized fibre

10 Calculation and expression of results

11 Precision
