ISO 21232:2018 (E)

Textiles — Determination of moisturizing effect of textile materials by measurement of microclimate between textiles and simulated human skin using sweating guarded hotplate

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Apparatus

6 Test procedure

- 6.1 Preparation of specimen
- 6.2 Specimen mounting on measuring unit
- 6.3 Determination of the apparatus constant Ret0_al and measurement of water-vapour resistance Ret_al and RH

7 Test report

Annex A (normative) Assessment of hydration value

- A.1 Principal of measurement
- A.2 Hydrometer
- A.3 Measurement of hydration value

Annex B (informative) Example of test results

- B.1 Comparison of Ret_al and RH
- B.2 Ret_al and RH of samples
