ISO 21153:2018 (E)

Corrosion of metals and alloys — Measurement of environmentally assisted small crack growth rate

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Specimen type and preparation

6 Crack precursor generation

6.1 Corrosion pits
6.2 Mechanical notching
6.3 FIB milling
6.4 Laser ablation
6.5 Electric discharge machining

7 Crack-size monitoring

7.1 Optical
7.2 Electrical resistance techniques
7.3 Calibration of crack measurement method

8 Precracking

9 Test apparatus

10 Environmental considerations

11 Test procedure

12 Data analysis

12.1 Estimating the crack depth
12.1.1 General
12.1.2 Surface breaking crack with depth at least that of the precursor
12.1.3 Surface breaking crack with depth less than that of the precursor
12.1.4 Crack emerging at base of precursor but not surface-breaking
12.2 Calculating the small crack growth rate

13 Mechanical driving force

14 Test report

Annex A (informative) Potential drop technique for crack monitoring
