ISO 20501:2019 (E)

Fine ceramics (advanced ceramics, advanced technical ceramics) — Weibull statistics for strength data

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

3.1 Defect populations
3.2 Mechanical testing
3.3 Statistical terms
3.4 Weibull distributions

4 Symbols

5 Significance and use

6 Method A: maximum likelihood parameter estimators for single flaw populations

6.1 General
6.2 Censored data
6.3 Likelihood functions
6.4 Bias correction
6.5 Confidence intervals

7 Method B: maximum likelihood parameter estimators for competing flaw populations

7.1 General
7.2 Censored data
7.3 Likelihood functions

8 Procedure

8.1 Outlying observations
8.2 Fractography
8.3 Graphical representation

9 Test report

Annex A (informative) Converting to material-specific strength distribution parameters

Annex B (informative) Illustrative examples

Annex C (informative) Test specimens with unidentified fracture origin

C.1 The four options
C.1.1 General
C.1.2 Option a)
C.1.3 Option b)
C.1.4 Option c)
C.1.5 Option d)
C.2 Proper use and implementation of the four options

Annex D (informative) Fortran program
