

# DIN EN 12954:2020-02 (E)

## General principles of cathodic protection of buried or immersed onshore metallic structures

---

<b>Contents</b>		<b>Page</b>
European foreword .....		4
Introduction .....		5
1	Scope .....	6
2	Normative references .....	6
3	Terms and definitions .....	7
4	Abbreviations and symbols .....	13
5	Cathodic protection personnel competence .....	13
6	Principles and criteria of cathodic protection .....	14
6.1	Principles of cathodic protection .....	14
6.2	Cathodic protection criteria .....	14
Table 1 -- Free corrosion potentials, protection potentials and limiting critical potentials of common metallic materials in soils and waters (except seawater and brackish water) measured against CSE .....		15
6.3	Alternative method .....	16
6.3.1	100 mV cathodic potential shift .....	16
6.3.2	Other methods .....	17
6.4	Criteria in presence of a.c .....	17
7	Prerequisites for application of cathodic protection .....	17
7.1	General .....	17
7.2	Electrical continuity .....	17
7.3	Electrical isolation .....	17
7.4	External coating .....	18
8	Useful data and design considerations .....	18
8.1	General .....	18
8.2	Structure details .....	19
8.3	Service conditions .....	19
9	Design .....	20
9.1	General .....	20
9.2	Design lifetime .....	20
9.3	Adjacent structures and external electrical sources .....	20
9.4	Electrical continuity/discontinuity .....	20
9.5	Protective coatings .....	21
9.6	Current demand .....	21
9.7	Galvanic anode systems .....	22
9.7.1	General considerations .....	22
9.7.2	Utilization of galvanic anode systems .....	22
9.7.3	Design of a galvanic anode system .....	22
9.7.4	Technical considerations and data for the design of a galvanic protection system .....	23
Table 2 -- Typical chemical compositions of the alloys used for zinc anodes .....		24

Table 3 -- Typical electrochemical parameters for zinc anodes used in soils .....	25
Table 4 -- Typical chemical compositions of the alloys used for magnesium anodes .....	25
Table 5 -- Typical electrochemical parameters for magnesium anodes used in soils .....	26
Figure 1 -- Current capacity of magnesium alloy versus current density [9] .....	27
9.8 A.C. and/or d.c. decoupling devices .....	28
9.9 Impressed current cathodic protection (ICCP) system .....	28
9.10 Monitoring .....	29
9.11 Cable .....	29
9.12 Impressed current groundbeds .....	30
10 Installation of cathodic protection systems .....	31
11 Commissioning .....	31
11.1 General .....	31
11.2 Preliminary checking .....	31
11.3 Start-up .....	32
11.4 Assessment of the cathodic protection effectiveness .....	32
11.5 Documentations .....	33
12 Monitoring, inspection and maintenance .....	33
12.1 General .....	33
12.2 Monitoring .....	34
12.3 Inspection .....	35
12.4 Maintenance .....	35
Annex A (informative) Corrosion likelihood in soils .....	36
Annex B (informative) Reduction of the corrosion rate by using a 100 mV cathodic polarization -- 100 mV cathodic potential shift .....	38
B.1 Measurement method during polarization .....	38
Figure B.1 -- Polarization formation method .....	38
B.2 Measurement method during depolarization .....	39
Figure B.2 -- Polarization decay method .....	39
Bibliography .....	40
