

# ISO 22700:2019 (E)

## Leather — Measuring the colour and colour difference of finished leather

---

### Contents

|         |   |
|---------|---|
|         | Foreword  |
| 1       | Scope   |
| 2       | Normative references  |
| 3       | Terms and definitions   |
| 4       | Principle   |
| 5       | Apparatus and materials   |
| 6       | Procedure   |
| 6.1     | Standardization of colour measuring instrument  |
| 6.2     | Sampling  |
| 6.3     | Measuring procedure   |
| 7       | Method of calculation   |
| 7.1     | General   |
| 7.2     | Tristimulus values  |
| 7.3     | CIE 1976 $L^*$ , $a^*$ , $b^*$ , $C^*ab$ and $h_{ab}$                                       |
| 7.4     | Calculation of the CIEDE2000 total colour difference formula                                |
| 8       | Test report   |
| Annex A | (informative) Background to standard procedure for measuring the colour of finished leather |
| A.1     | General   |
| A.2     | Visual assessment of colour and colour differences  |
| A.3     | Colour difference formulae  |
